Read a Moon phase model

What can a labelled paper model explain about the Moon's changing appearance?

Where the light comes from

Draw or describe sunlight travelling from left to right.

Two illuminated halves

Keep each Moon’s Sun-facing half lit.

The view from Earth

Compare what the observer can see at A and B.

A correction or limit

Explain why ‘Earth’s shadow makes every phase’ does not fit this model.

Keep it, change it or leave it here. Sharing is optional.
