# Read the shape of a drawn hill

**What do contour spacing and height labels tell us about a landscape model?**

## My contour interval

What height difference separates neighbouring lines?

## Equal height

Choose two points on one line. What height do they share?

## Spacing comparison

Which side is steeper, and which visible detail supports that?

## An unknown

What cannot be calculated or inferred from this drawing?

Keep it, change it or leave it here. Sharing is optional.
