Remix an eight cell rhythm

Can two rhythms have the same length and number of sounds but different patterns?

My legend

State the reading direction, half-beat cell length and meanings of X and dot.

Pattern A

Draw eight cells and copy or create a pattern. Count its sound beginnings.

Pattern B

Move one X into an empty cell. Record exactly which cell changed.

Same and different

Compare total beats, number of sounds and where each sound begins.

Keep it, change it or leave it here. Sharing is optional.
