# A beak drawing and a function question

**What can shape alone suggest, and what needs a checked reference?**

## Visible model information

Record dimensions, units and how each was defined.

## My calculation

Show length divided by width for each model.

## A tentative function question

Keep a possible idea distinct from an established fact.

## Missing evidence

Name a suitable reference or observation; no animal interaction is needed.

Keep it, change it or leave it here. Sharing is optional.
